## Chill & Char's Multiplication Quest

Help Chill & Char solve the multiplication questions below!

Circle the correct answer for each question.

1. What does  $2 \times 5 = 10$  mean?

- a) That 2 times as much as 5 is 10
- b) That 2 and 5 make 10
- c) That 10 times as much as 5 is 2

2. What does  $4 \times 3 = 12$  mean?

- a) That 4 and 3 make 12
- b) That 4 sets of 3 is 12
- c) That 12 times as much as 3 is 4

3. What does  $7 \times 6 = 42$  mean?

- a) That 42 times as much as 6 is 7
- b) That 7 times as much as 42 is 6
- c) That 6 times as much as 7 is 42

4. What does  $2 \times 4 = 8$  mean?

- a) That 2 sets of 4 is 8
- b) That 2 and 4 make 8
- c) That the quotient of 2 and 4 is 8

5. What does  $9 \times 1 = 9$  mean?

- a) That 9 times as much as 9 is 1
- b) That 9 times as much as 1 is 9
- c) That 9 and 1 make 9

6. What does  $8 \times 3 = 24$  mean?

- a) That 3 and 8 make 24
- b) That the quotient of 8 and 3 is 24
- c) That 8 sets of 3 is 24

7. What does  $5 \times 5 = 25$  mean?

- a) That 5 sets of 5 is 25
- b) That 5 and 5 make 25
- c) That 25 times as much as 5 is 25

8. What does  $2 \times 9 = 18$  mean?

- a) That 2 times as much as 18 is 9
- b) That 2 times as much as 9 is 18
- c) That 18 times as much as 2 is 9

# Chill & Char's Multiplication Quest:

## Multiplication as a Comparison

### Answer Key

1. What does  $2 \times 5 = 10$  mean?

- a) That 2 times as much as 5 is 10
- b) That 2 and 5 make 10
- c) That 10 times as much as 5 is 2

2. What does  $4 \times 3 = 12$  mean?

- a) That 4 and 3 make 12
- b) That 4 sets of 3 is 12
- c) That 12 times as much as 3 is 4

3. What does  $7 \times 6 = 42$  mean?

- a) That 42 times as much as 6 is 7
- b) That 7 times as much as 42 is 6
- c) That 6 times as much as 7 is 42

4. What does  $2 \times 4 = 8$  mean?

- a) That 2 sets of 4 is 8
- b) That 2 and 4 make 8
- c) That the quotient of 2 and 4 is 8

5. What does  $9 \times 1 = 9$  mean?

- a) That 9 times as much as 9 is 1
- b) That 9 times as much as 1 is 9
- c) That 9 and 1 make 9

6. What does  $8 \times 3 = 24$  mean?

- a) That 3 and 8 make 24
- b) That the quotient of 8 and 3 is 24
- c) That 8 sets of 3 is 24

7. What does  $5 \times 5 = 25$  mean?

- a) That 5 sets of 5 is 25
- b) That 5 and 5 make 25
- c) That 25 times as much as 5 is 25

8. What does  $2 \times 9 = 18$  mean?

- a) That 2 times as much as 18 is 9
- b) That 2 times as much as 9 is 18
- c) That 18 times as much as 2 is 9
